

It is important to kepp the do not call list in New Jersey working, I have it, but still get calls, not as many, and the calls are always worthless, the telemarketers have no research to back their reason for calling, I have had calls for my son for re-mortgaging, when he doesn't have a mortgage in the first place, and its like clockwork, the calls are the same time everyday, and i have requested they removed me from their lists, but they still call everyday. I don't need these calls.
